

# NeuroIS Training Course 2022

A Pre-Event of the NeuroIS Retreat 2022

—Theme—

## ***Getting Started with NeuroIS: Choosing Tools, Methodologies, and Theories***

**June 14, 2022**

09.00 – 16.00

Central European Summer Time (CEST)

### **Venue**

Schloss Wilhelminenberg, Savoyenstrasse 2, 1160 Vienna, Austria

For details, please see [Travel Information](#)

**The training course is free of charge for NeuroIS Society members, but registration is required.**

Because the NeuroIS field is still in a relatively early stage of development, it is important that interested researchers have opportunities to learn NeuroIS concepts, including knowledge on human neurobiology and neuroscience tools. Based on a reasonable degree of neuroscience knowledge, academics can develop insight that is necessary to evaluate the potential of neuroscience for specific research areas in the information systems (IS), design science, and computing disciplines, and to choose appropriate tools, methods, and theories. Solid knowledge is indispensable for researchers, reviewers, and journal editors.

The *NeuroIS Training Course 2022*, an offer of the NeuroIS Society, is designed to give participants a basic foundation in major concepts, methods, and tools related to NeuroIS research. This course is specifically designed to collaborate in actively developing NeuroIS research strategies for early-stage research ideas of interest to the participants. Participants are asked to submit research ideas in advance, and to come prepared to briefly present and discuss their ideas in a workshop atmosphere. The tutors – Fred D. Davis (Texas Tech University, USA), Pierre-Majorique Léger (HEC Montréal, Canada), Gernot Müller-Putz (Graz University of Technology, Austria), and René Riedl (University of Applied Sciences Upper Austria and University of Linz, Austria) – will provide feedback and suggestions based on the nature of the research ideas. Participation should provide value for IS, computer science, and management PhD students and faculty. There are no specific prerequisites for participation. English is the course language.

The course uses an interactive teaching approach, and it covers fundamental themes, including the following questions: Why do we need NeuroIS? How to conduct NeuroIS studies? What constitutes a good NeuroIS contribution? The course takes a beginner rather than an expert approach to the material presented, and it is mainly based on the following book: Riedl, R. & Léger, P.-M.: *Fundamentals of NeuroIS: Information Systems and the Brain*. Springer, 2016. It is helpful to read the following paper on the development of the field in preparation for the course, yet, it is not mandatory: Riedl, R.; Fischer, T.; Léger, P.-M.; Davis, F. D.: A Decade of NeuroIS Research: Progress, Challenges, and Future Directions. *DATA BASE for Advances in Information Systems*, 51/3, 2020, 13-54.

Research ideas can be submitted in English to [info@NeuroIS.org](mailto:info@NeuroIS.org) – submission deadline: May 12, 2022; please send a WORD or PDF file. Research idea documents may not exceed 2 pages of text and should include author name(s) and contact information, as well as a description of: (1) problem statement, (2) research question(s) and/or hypotheses, (3) intended methods/tools, (4) expected contribution, and (5) key references. Participants should be prepared to present their research ideas at the course (the presentation should last approximately 20 minutes). Based on this presentation, the tutors will provide their comments and recommendations. Based on this interactive format, it is hoped that participants get a maximum of feedback on their research ideas. Please note that it is possible to participate without submitting a research idea document. To register for the course, please follow the instructions provided at [www.NeuroIS.org](http://www.NeuroIS.org). If requested, attendees can receive a certificate of participation. This course is a pre-event of the *NeuroIS Retreat 2022*, which officially starts with dinner on June 14.

## Tutors

**Fred D. DAVIS** is Professor and Stevenson Chair in Information Technology at Texas Tech University Rawls College of Business. He received his Ph.D. from MIT, and his research interests include user acceptance of information technology, technology supported decision making, skill acquisition, and NeuroIS. He has been a co-organizer of the NeuroIS Retreat since 2009. His research has been published in MIS Quarterly, Information Systems Research, Management Science, Journal of Applied Psychology, Journal of MIS, Journal of the Association for Information Systems, Information Systems Journal, Computers in Human Behavior, and others.

**Pierre-Majorique LÉGER** is a Full Professor of Information Systems at HEC Montréal. He holds a PhD in industrial engineering from École Polytechnique de Montréal and has done post-doctoral studies in information technologies at HEC Montréal and NYU Stern. He is the senior chairholder of the NSERC Industrial Research Chair in User Experience (UX). He is the director of the ERPSim Lab and co-director of Tech3Lab. He has published articles in the Journal of the Association for Information Systems, Journal of Management of Information Systems, Information & Management, Technovation, Computers in Human Behavior, PLoS ONE, and others. Moreover, he is a co-author of the book “Fundamentals of NeuroIS: Information Systems and the Brain”.

**Gernot MÜLLER-PUTZ** is Head of the Institute of Neural Engineering and its associated BCI-Lab at Graz University of Technology. He received his MSc in electrical and biomedical engineering in 2000, his PhD in 2004 and his habilitation in 2008. Since 2014 he is full professor for semantic data analysis. His expertise is in biosignal analysis, EEG and BCI research. He has managed several national and international projects and organized and hosted international BCI Conferences and has been PC-Member in several other conferences. He is Associate Editor of IEEE TBME, BCI Journal. He is Speciality Editor-in-Chief of Frontiers in Human Neuroscience: Brain-Computer Interfaces. He has authored more than 350 peer-reviewed publications and conference contributions. In 2015, he won an ERC Consolidator Grant, in 2017 the Ludwig- Guttman-Award. In 2018 he joined the Board of Directors of the International BCI Society. He is scientific Co-Director of the NeuroIS Society.

**René RIEDL** is a professor for Digital Business and Innovation at the University of Applied Sciences Upper Austria and an associate professor for Business Informatics at the University of Linz. Also, he is the scientific director of the NeuroIS Society. He has published in various academic journals, including BMC Neurology, Business & Information Systems Engineering, Frontiers in Psychology, Journal of Information Technology, Journal of Management Information Systems, Journal of Neuroscience, Psychology, and Economics, Journal of Systems & Software, Journal of the Association for Information Systems, MIS Quarterly, and PLoS ONE. He is a co-author of the book “Fundamentals of NeuroIS: Information Systems and the Brain”.
